If extension cords are used at the Will Rogers Memorial Complex, Ground Fault Circuit Interrupt Protection (GFCI) is required. This cord is sold at most building or electrical supply stores. These cords are easily recognized as they have a test and a reset button on the cord. Most of these cords have the words "GFCI protected" printed on the cord.

All 120-volt extension cords shall be three wire grounding type cords (recognized by the three-prong plug on the end of the cord). Frayed or damaged cords may not be used. Extension cords may not be placed through door ways.

These requirements will help eliminate harmful or fatal electrical hazards to you and/or your animals. City staff, including Fire Inspectors and Electrical Inspectors will check the premises from time to time for your compliance.
